

Why we're here

Wildfires in Europe are becoming larger, faster and more dangerous. MEJOR Technologies develops CHRIS, a real time incident mapping solution, and LUCI, an AI driven wildfire risk intelligence platform, to help emergency services and organisations act faster, smarter and safer.

What you'll learn

- How commercial and marketing operations work in a tech scale-up
- Market research and opportunity identification across Europe
- Content publishing, event support and documentation management
- Lead generation and CRM processes
- How drones, AI and wildfire technology are used in practice

What you'll do

- Support commercial and marketing activities
- Make website updates and perform basic checks
- Publish social media content and coordinate publications
- Prepare article drafts and presentations
- Keep documentation, visuals and CRM data up to date
- Research markets, organisations, events and leads
- Support demos, meetings and pilot tracking.

What we're looking for

- Enrolled in a relevant HBO or WO programme (business, marketing or similar)
- Strong written and spoken English
- Structured, proactive and comfortable working independently
- Interest in technology, AI, drones or safety is a plus

Practical details

- Start date: February 2026
- Duration: 6 months
- Location: Amersfoort, hybrid (around 3 days per week onsite)
- Competitive internship compensation

What we offer

- A hands-on internship with real responsibility
- Fast learning in a growing tech company
- Exposure to international projects and customers
- A supportive, mission-driven team
- Hybrid working and free lunch at the office
