

Founders Associate Internship

Location: Amsterdam (office by Vondelpark)

Start: 2026

Duration: 6 months

Company: SKUU

About SKUU

At SKUU we are building a real-time infrastructure platform that connects inventory across multi-brand retailers, so that products never show as "out of stock" again. We address a broken e-commerce dynamic of fragmented inventory, lost sales and frustrated customers. Over time this becomes the foundation for a scalable cross-border network that changes how inventory flows.

The Role

As an intern you will work closely with the founders in a start-up environment. You'll support operational set-up, partner and retailer onboarding, data tracking and process optimisation. You will get to see how a software start-up works, what the challenges are and help us build the engine of SKUU.

What You'll Do

- Map and improve internal workflows around partner connectivity and inventory flows
- Assist with retailer onboarding: data intake, checklists, progress tracking
- Help collect and report key metrics: order flows, stock utilisation, partner performance
- Work on improvement projects: identify a challenge, propose a solution and execute it
- Support the founding team with day-to-day operational work to keep things moving

Who You Are

You are enrolled in a HBO programme in a related field (e-commerce, business, operations, data, etc.). You are available full-time for six months from beginning 2026. You are analytical, hands-on and enjoy taking ownership. You like working in a fast-moving start-up and want to contribute real impact.

Why SKUU

Joining SKUU now means stepping into a high-growth start-up with big ambitions. You become part of a founding team, work directly with the founders, and help shape how the company runs. You'll learn,

you'll deliver, and you'll see your work affect the company.

[Apply](#)

CVs are optional. What matters most are real examples of challenges you've solved and how you approached them. Please include links to previous projects, or case studies, along with a short note on your role, responsibilities and how you managed/solved it. This is important so we can understand your experience and how you think.

If this sounds like you, send your portfolio, case studies or examples of what you've built to
